

EIZO Acquires the ISO/IEC 27001:2013 International Standard to Ensure Compliance Related to the Protection of Information Assets

Hakusan, Japan, December 8, 2022 – EIZO Corporation (TSE : 6737) and EIZO Support Network Corporation acquired ISO/IEC 27001:2013, an international standard for information security management systems (ISMS).

ISO/IEC 27001 is the world's most well-known standard for ISMS to ensure and continuously improve the confidentiality, integrity, and availability of information and related assets (hereinafter referred to as information assets) that an organization should protect. Effective operation of this management system enables EIZO to protect information from security breaches, develop and implement appropriate control measures, and strengthen methods by which information is kept secure by having all employees working within the organization participate in various information security measures.

EIZO recognizes its social responsibility to protect the information assets collected through its business activities from information security threats and has taken measures to thoroughly safeguard them. EIZO was audited by TÜV Rheinland Cert GmbH, a third-party certification organization based in Germany, which certified that the EIZO Group's information security management and initiatives comply with international standards.

EIZO will continue to place the highest priority on maintaining and improve its ISMS to protect information assets and manage them responsibly.
