

User's Manual Bedienungsanleitung Manuel d'utilisation

FlexScan® L760T-C

Touch Panel Color LCD Monitor
LCD-Farbmonitor mit Touch-Panel
Moniteur couleur LCD à écran tactile

Important

Please read this User's Manual carefully to familiarize yourself with safe and effective usage. Please retain this manual for future reference.

Wichtig

Bitte lesen Sie diese Bedienungsanleitung sorgfältig durch, um sich mit dem sicheren und rationellen Betrieb dieses Produkts vertraut zu machen. Bewahren Sie das vorliegende Handbuch zu Referenzzwecken auf.

Important

Veuillez lire attentivement ce Manuel d'utilisation afin de vous familiariser avec ce produit et de l'utiliser efficacement et en toute sécurité. Veuillez conserver ce manuel pour référence ultérieure.

For U.S.A, Canada, etc. (rated 100-120 Vac) Only

FCC Declaration of Conformity

We, the Responsible Party

EIZO Inc.
5710 Warland Drive, Cypress, CA 90630
Phone: (562) 431-5011

declare that the product

Trade name: EIZO
Model: FlexScan L760T-C

is in conformity with Part 15 of the FCC Rules. Operation of this product is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- * Reorient or relocate the receiving antenna.
- * Increase the separation between the equipment and receiver.
- * Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- * Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note

Use the attached specified cable below or EIZO signal cable with this monitor so as to keep interference within the limits of a Class B digital device.

- AC Cord
- Shielded Signal Cable
- Stereo mini-jack cable

Canadian Notice

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

User's Manual

FlexScan[®] L760T-C

Touch Panel Color LCD Monitor

It shall be assured that the final system is in compliance
to IEC60601-1-1 requirement.

SAFETY SYMBOLS

This manual uses the safety symbols below. They denote critical information. Please read them carefully.

WARNING

Failure to abide by the information in a WARNING may result in serious injury and can be life threatening.

CAUTION

Failure to abide by the information in a CAUTION may result in moderate injury and/or property or product damage.

Indicates a prohibited action.

Indicates to ground for safety.

- This product has been adjusted specifically for use in the region to which it was originally shipped. If operated outside this region, the product may not perform as stated in the specifications.

- Power supplied equipment can emit electromagnetic waves, that could influence, limit or result in malfunction of the monitor. Install the equipment in a controlled environment, where such effects are avoided.
- This is a monitor intended for use in a medical imaging system. It does not support the display of mammography images for diagnosis.

No part of this manual may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, or otherwise, without the prior written permission of EIZO Corporation.

EIZO Corporation is under no obligation to hold any submitted material or information confidential unless prior arrangements are made pursuant to EIZO Corporation's receipt of said information. Although every effort has been made to ensure that this manual provides up-to-date information, please note that EIZO monitor specifications are subject to change without notice.

APPENDIX/ANHANG/ANNEXE i

⚠ PRECAUTIONS

IMPORTANT!

- This product has been adjusted specifically for use in the region to which it was originally shipped. If operated outside the region to which it was originally shipped, the product may not perform as stated in the specifications.
- To ensure personal safety and proper maintenance, please read this section and the caution statements on the unit (refer to the figure below).

[Location of the Caution Statements]

[Symbols on the unit]

Symbol	Location	This symbol indicates
⊕	Front Control panel	Power button Press to turn the monitor's power on or off.
~	Rear Name Plate	Alternating current
⚡	Rear	Alerting electrical hazard
⚠	Rear	Caution Refer to SAFETY SYMBOLS section in this manual.

⚠ WARNING

If the unit begins to emit smoke, smells like something is burning, or makes strange noises, disconnect all power connections immediately and contact your dealer for advice.

Attempting to use a malfunctioning unit may result in fire, electric shock, or equipment damage.

Do not open the cabinet or modify the unit.

Opening the cabinet or modifying the unit may result in fire, electric shock, or burn.

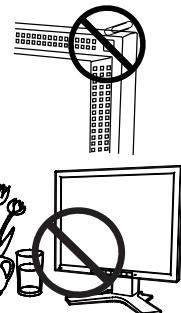

Refer all servicing to qualified service personnel.

Do not attempt to service this product yourself as opening or removing covers may result in fire, electric shock, or equipment damage.

Keep small objects or liquids away from the unit.

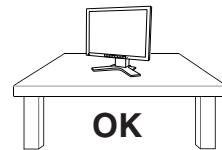

Small objects accidentally falling through the ventilation slots into the cabinet or spillage into the cabinet may result in fire, electric shock, or equipment damage.

If an object or liquid falls/spills into the cabinet, unplug the unit immediately. Have the unit checked by a qualified service engineer before using it again.

Place the unit at the strong and stable place.

A unit placed on an inadequate surface may fall and result in injury or equipment damage.

If the unit falls, disconnect the power immediately and ask your dealer for advice. Do not continue using a damaged unit. Using a damaged unit may result in fire or electric shock.

Use the unit in an appropriate location.

Not doing so may result in fire, electric shock, or equipment damage.

..
..
..
..

- * Do not place outdoors.
- * Do not place in the transportation system (ship, aircraft, trains, automobiles, etc.).
- * Do not place in a dusty or humid environment.
- * Do not place in a location where water is splashed on the screen (bathroom, kitchen, etc.).
- * Do not place in a location where the steam comes directly on the screen.
- * Do not place near heat generating devices or a humidifier.
- * Do not place in a location where the product is subject to direct sunlight.
- * Do not place in an inflammable gas environment.

WARNING

To avoid danger of suffocation, keep the plastic packing bags away from babies and children.

Use the enclosed power cord and connect to the standard power outlet of your country.

Be sure to remain within the rated voltage of the power cord.

Not doing so may result in fire or electric shock.

Power Supply: 100-120/200-240 Vac 50/60Hz

To disconnect the power cord, grasp the plug firmly and pull.

Tugging on the cord may damage and result in fire or electric shock.

The equipment must be connected to a grounded main outlet.

Failure to do so may result in fire or electric shock.

Use the correct voltage.

* The unit is designed for use with a specific voltage only. Connection to another voltage than specified in this User's Manual may cause fire, electric shock, or equipment damage.

Power Supply: 100-120/200-240 Vac 50/60Hz

* Do not overload your power circuit, as this may result in fire or electric shock.

Handle the power cord with care.

* Do not place the cord underneath the unit or other heavy objects.
* Do not pull on or tie the cord.

If the power cord becomes damaged, stop using it. Use of a damaged cord may result in fire or electric shock.

For the electrical safety, do not connect or disconnect the power cord in the presence of patients.

Never touch the plug and power cord if it begins to thunder.

Touching them may result in electric shock.

When attaching an arm stand, please refer to the user's manual of the arm stand and install the unit securely.

Not doing so may cause the unit to become unattached, which may result in injury or equipment damage. Before installation, make sure that desks, walls, and others an arm stand is fixed on have adequate mechanical strength. When the unit is dropped, please ask your dealer for advice. Do not continue using a damaged unit. Using a damaged unit may result in fire or electric shock. When reattaching the tilt stand, please use the same screws and tighten them securely.

WARNING

Do not touch a damaged LCD panel directly with bare hands.

The liquid crystal that may leak from the panel is poisonous if it enters the eyes or mouth.

If any part of the skin or body comes in direct contact with the panel, please wash thoroughly.

If some physical symptoms result, please consult your doctor.

Fluorescent backlight lamps contain mercury (the products that have LED backlight lamps contain no mercury), dispose according to local, state or federal laws.

Exposure to elemental mercury can result in effects on the nervous system, including tremor, memory loss, and headache.

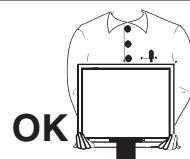

CAUTION

Handle with care when carrying the unit.

Disconnect the power cord and cables when moving the unit. Moving the unit with the cord attached is dangerous. It may result in injury.

When handling the unit, grip the bottom of the unit firmly with both hands ensuring the panel faces outward before lifting.

Dropping the unit may result in injury or equipment damage.

Do not block the ventilation slots on the cabinet.

- * Do not place any objects on the ventilation slots.
- * Do not install the unit in a closed space.
- * Do not use the unit laid down or upside down.

Blocking the ventilation slots prevents proper airflow and may result in fire, electric shock, or equipment damage.

Do not touch the plug with wet hands.

Doing so may result in electrical shock.

Use an easily accessible power outlet.

This will ensure that you can disconnect the power quickly in case of a problem.

Periodically clean the area around the plug.

Dust, water, or oil on the plug may result in fire.

Unplug the unit before cleaning it.

Cleaning the unit while it is plugged into a power outlet may result in electric shock.

CAUTION

If you plan to leave the unit unused for an extended period, disconnect the power cord from the wall socket after turning off the power switch for the safety and the power conservation.

This product is only suitable for a patient environment, but not for contact with a patient.

Notice for this monitor

This product is suited to general purposes like creating documents, viewing multimedia content.

Monitors should be set to a lower brightness to reduce changes in luminosity caused by long-term use and maintain a stable display.

The LCD panel is manufactured using high-precision technology. Although, missing pixels or lit pixels may appear on the LCD panel, this is not a malfunction. Percentage of effective dots: 99.9994% or higher.

The backlight of the LCD panel has a fixed life span. When the screen becomes dark or begins to flicker, please contact your dealer.

Do not scratch or press on the panel with any sharp objects, as this may result in damage to the panel. Do not attempt to brush with tissues as this may scratch the panel.

When the screen image is changed after displaying the same image for extended periods of time, an afterimage may appear. Use the screen saver or power save function to avoid displaying the same image for extended periods of time.

When the monitor is cold and brought into a room or the room temperature goes up quickly, dew condensation may occur on the interior and exterior surfaces of the monitor. In that case, do not turn the monitor on. Instead wait until the dew condensation disappears, otherwise it may cause some damage to the monitor.

To use the monitor comfortably

An excessively dark or bright screen may affect your eyes. Adjust the brightness of the monitor according to the environmental conditions.

Staring at the monitor for a long time tires your eyes. Take a 10-minute rest every hour.

1. INTRODUCTION

Thank you very much for choosing an EIZO Color Monitor.

1-1. Features

- Dual inputs compliant
- DVI (p.34) Digital input (TMDS (p.35)) compliant.
- Horizontal scanning frequency: Analog input 30 - 81 kHz
Digital input 30 - 65 kHz
- Vertical scanning frequency: Analog input 49.5 - 75.5 Hz
Digital input 59 - 61 Hz (VGA text: 70 Hz)
- Resolution: 1 M pixels (1280 dots x 1024 lines)
- Auto Adjustment compliant
- Support to sRGB (p.35) standard
- The height adjustable stand incorporated
- Touch Panel provided
- Touch Panel Pointer “TP1” is available (optional, p.15)

1-2. Package Contents

Please contact your local dealer for assistance if any of the listed items are missing or damaged.

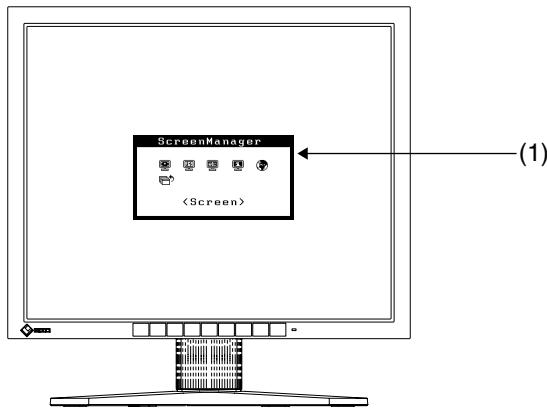

- LCD Monitor
- Power Cord
- Signal Cable (MD-C87)
- Touch Panel Cable (FD-C38)
- User's Manual
- ScreenManager Quick Reference
- LIMITED WARRANTY
- EIZO Touch Panel Disk (CD-ROM)
(Contents: MT 7 (Touch Panel Driver), Installation Guide)

NOTE

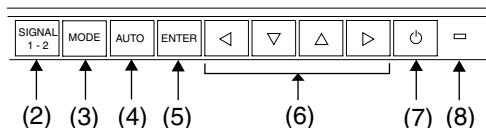

- Please retain the packing materials for future transference.
- For the touch panel driver installation procedure and cautions, refer to the Installation Guide on the CD-ROM.

1-3. Controls & Connectors

Front

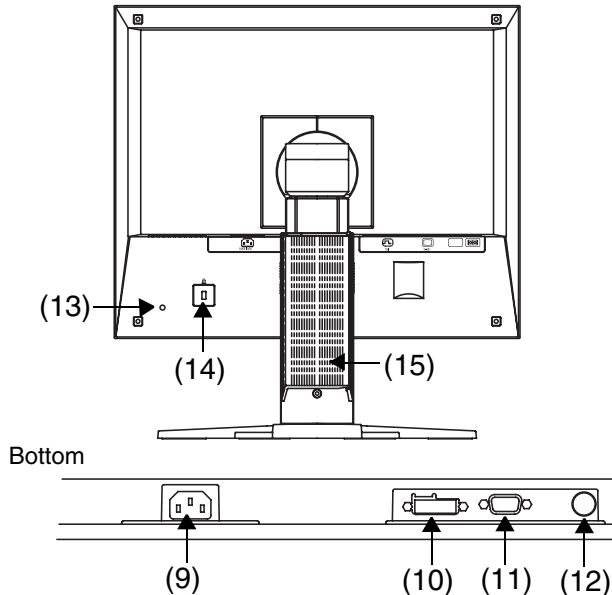

Control Panel

(1)ScreenManager®		Monitor Adjustment menu (p.16)
(2) SIGNAL1-2	Input Signal Selection Button	Switch the input signals when connecting 2 PCs. (p.15)
(3) MODE	Mode Button	Show or switch the color mode. (p.23)
(4) AUTO	Auto Adjustment Button	Adjust the screen to appropriate condition automatically. (analog input only)
(5) ENTER	Enter Button	Show the ScreenManager on the screen. Confirm the setting / adjustment function. Save the adjustment values.
(6)◀▽△▷	Control Buttons (Left, Down, Up, Right)	Select the desired function. Increase and decrease the adjustment value.
(7)⏪	Power Switch	ON or OFF the monitor's power.
(8)█	Power Indicator	Indicate monitor's operation status. Blue: Operation Flashing blue: Last 15 min. of operation time before entering the power off state. (p.18) Flashing yellow slowly: Power off

Rear

(9)	Power Connector	Connect the power cord.
(10)	DVI-D Connector (SIGNAL1)	Connect the optional digital cable.
(11)	D-Sub mini 15 pin Connector (SIGNAL2)	Connect the enclosed analog cable (MD-C87)
(12)	RS-232C port	Connect the enclosed touch panel cable (FD-C38).
(13) Hole for TP1		Hole for installing the lead of the TP1 (Optional Touch Panel Pointer).
(14)	Security Lock Slot	Allows for connection of a security cable. This lock supports Kensington's MicroSaver security system.
(15) Stand (Detachable)		The LCD monitor can be used with an other stand by removing the stand (see page 25).

2. CABLE CONNECTION

2-1. Before connecting

Before connecting your monitor to the PC, change the display screen settings (resolution (p.35) and frequency) in accordance with the charts below.

NOTE

- The lower display modes like 640x 480, automatically enlarge to the maximum display mode (1280 x 1024), and some lines of the characters may become fuzzy. In this case, use <Smoothing> function (p.22) to make the lines clear.
- When your computer and display support VESA DDC, the suitable resolution and the refresh rate are set by just plugging your display into the computer without any manual settings.

Analog Input

Resolution	Frequency	Dot Clock	Remarks
320 × 200	70 Hz	135 MHz(Max)	VGA Mode13
640 × 480	~75 Hz		VGA, VESA
720 × 400	70 Hz		VGA TEXT
800 × 600	~75 Hz		VESA
1024 × 768	~75 Hz		VESA
1152 × 864	75 Hz		VESA
1280 × 960	60 Hz		VESA
1280 × 1024	~75 Hz		VESA

Digital Input

Resolution	Frequency	Dot Clock	Remarks
640 × 480	60 Hz	109 MHz (Max)	VGA
720 × 400	70 Hz		VGA TEXT
800 × 600	60 Hz		VESA
1024 × 768	60 Hz		VESA
1280 × 1024	60 Hz		VESA

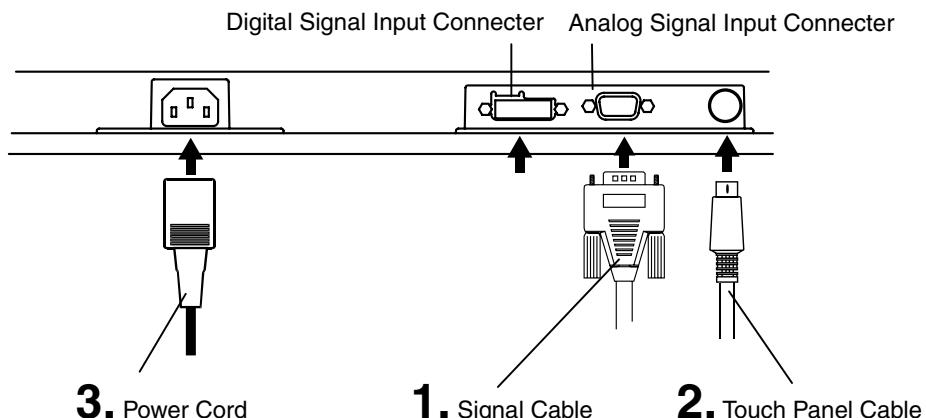

2-2. Connecting the signal cable

NOTE

- Be sure that the power switches of both the PC and the monitor are OFF.

1. Plug the signal cable into the connector at the rear of the monitor and the other end of the cable into the video connector on the PC.

After connecting, secure the connection with the screw-in fasteners.

Analog Input

Signal Cable	Connector of PC	PC
Signal Cable (enclosed, MD-C87) 	Video Output Connector/ D-Sub mini 15 pin Input Connector (monitor)/ D-Sub mini 15 pin	<ul style="list-style-type: none"> • Standard graphics card

Digital Input

Signal Cable	Connector of PC	PC
FD-C39 (Optional) 	Video Output Connector DVI-I Input Connector (monitor)/ DVI	<ul style="list-style-type: none"> • Digital Graphics card

2. Plug the enclosed touch panel cable (FD-C38) into the RS-232C port of the monitor. Then, plug the other end of the cable into the COM port of the PC.

3. Plug the power cord into the power connector on the rear of the monitor. Then, plug the other end of the cord into a power outlet.

WARNING

Use the enclosed power cord and connect to the standard power outlet of your country.

Be sure to remain within the rated voltage of the power cord.

Not doing so may cause in fire or electric shock.

The equipment must be connected to a grounded main outlet.

Not doing so may cause in fire or electric shock.

4. Turn on the monitor's main power and then switch on the PC's power.

The monitor's power indicator will light up (blue).

If an image does not appear, refer to the "6. TROUBLESHOOTING" (p.26) for advice.

5. Install the touch panel driver according to the instructions included in the EIZO Touch Panel Disk (CD-ROM).

NOTE

- For the touch panel driver installation procedure and cautions, refer to the Installation Guide on the CD-ROM.

NOTE

- Whenever finished, turn off the PC and the monitor. Disconnecting the monitor from the power supply is recommended to save energy completely.
- Adjust brightness of the screen depending on the brightness of your environment. Too dark or too bright of a screen can cause eyestrain.
- Be sure to take adequate rests. A 10-minute rest period each hour is suggested.

2-3. Touch Operation

Point and touch with one finger only.

NOTE

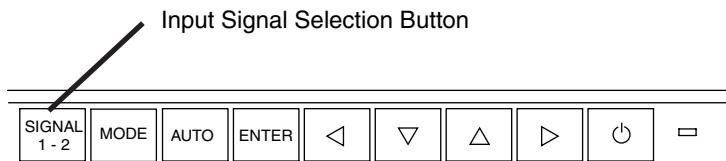

- Do not touch the screen while turning on the PC and the monitor. Touch the screen one second later after appearing the image.
- For the users with gloves, we recommend to use touch panel pointer, "TP1" (optional). Regarding the installation, please refer to the User's Manual of TP1.

2-4. Connecting two PCs to the monitor

Two PCs can be connected to the monitor through the DVI and the D-Sub mini 15 pin connector on the back of the monitor.

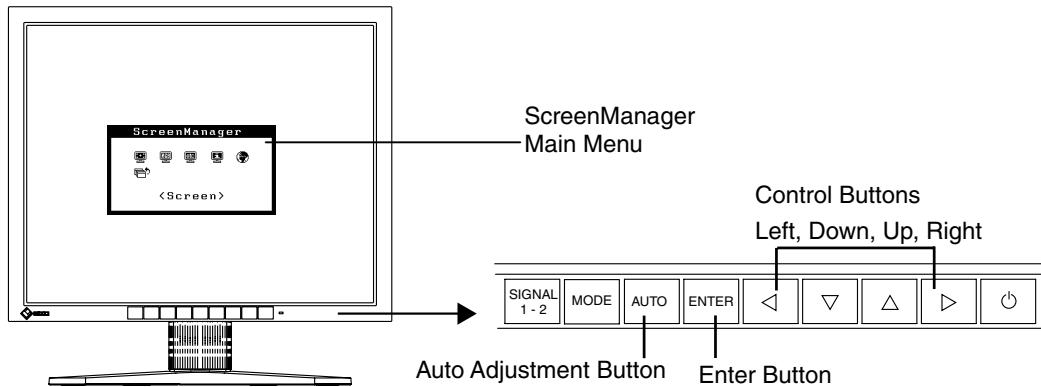

Selecting the active input

The Input Signal Selection Button on the control panel can be used to select either Signal 1 or Signal 2 as the active input at any time. Every time the button is pressed, the input changes. When switching the signal, the kind of the input signal (Signal1 or 2/Analog or Digital) is displayed for a few seconds on the right top corner of the screen.

3. ScreenManager

3-1. How to use the ScreenManager

1. Entering the ScreenManager

Press the Enter Button once to display the main menu of the ScreenManager.

2. Making Adjustments and Settings

- (1) Select the desired sub menu icon using the Control Buttons and press the Enter Button. The sub menu appears.
- (2) Use the Control Buttons to select the desired setting icon and press the Enter Button. The setting menu appears.
- (3) Use the Control Buttons to make all required adjustments and press the Enter Button to save the settings.

3. Exiting the ScreenManager

- (1) To return to the main menu, select the <Return> icon or press the Down Button twice, followed by the Enter Button.
- (2) To exit the ScreenManager, select <Exit> icon or press the Down Button twice, followed by the Enter Button.

NOTE

- Double clicking the Enter Button at any time also exits the ScreenManager menu.

3-2. Adjustments and Settings

The following table shows all the ScreenManager's adjustment and setting menus.
“*” indicates adjustments of analog input only.

Main menu	Sub menu	Reference
Screen	Clock *	4-1. Screen Adjustment (p.20)

¹ Due to the inspection on the factory, the usage time may not “0 hour” at shipping.

3-3. Useful Functions

Adjustment Lock

Use the “Adjustment Lock” function to prevent any accidental changes.

Locked function	<ul style="list-style-type: none"> • Auto Adjustment Button adjustments and settings in the ScreenManager.
Unlocked function	<ul style="list-style-type: none"> • Adjustment of brightness by the Control Buttons. • Input Signal Selection Button • Mode Button

[To lock]

- (1) Switch off the monitor’s power by the power switch on the control panel.
- (2) Press on the Auto adjustment button while switching on the monitor’s power.

[To unlock]

- (1) Switch off the monitor’s power by the power switch on the control panel.
- (2) Hold down the Auto adjustment button once again and turn the power back on.

Off Timer

The off timer function causes the monitor to automatically enter a power off state after a predetermined amount of time has lapsed. This function was created to reduce afterimage characteristics that are particular to LCD monitors when the monitor screen is left on for a long period without use.

[Procedure]

- (1) Select <Off Timer> in the ScreenManager <Others> menu.
- (2) Select “Enable” and press the Right and Left Buttons to adjust the “On Period” (1 to 23 hours).

[Off timer system]

PC	Monitor	Power Indicator
On Period (1H - 23H)	Operation	Blue
Last 15 min. in “On period”	Advance Notice ¹	Blue Flashing
“On period” expired	Power off	Flashing yellow slowly

¹ Advance notice (Power Indicator flashing blue) will be given 15 minutes before the monitor automatically enters the “Power Off” mode. To delay entering the “Power Off” mode, press the power switch during the advance notice period. The monitor will continue to operate for an additional 90 minutes.

[Power Resumption Procedure]

Press the power switch.

EIZO Logo display

Enables to display the EIZO logo for a while when switching on the monitor (Default is no logo). If you desire to display or undisplay this logo, use this function.

[To display]

- (1) Switch off the monitor's power by the Power switch on the control panel.
- (2) Hold down the Enter button once again and turn the power back on.

[To undisplay]

- (1) Switch off the monitor's power by the Power switch.
- (2) Hold down the Enter button once again and turn the power back on.

Automatically selecting the input signal function

The monitor will automatically detect the inputted signal of either the connection for display.

Connecting two PCs to the monitor

When the one computer is switched off, the monitor will automatically display the other signal.

Use the ScreenManager to switch the input selection to manual.

[Procedure]

- (1) Select <Input Signal> in the <Others> menu.
- (2) Select “Manual”.

4. ADJUSTMENT

When digital signals are input, images are displayed correctly based on the preset data of the monitor, but if characters and/or lines appear blurred, go to step 5 [Smoothing]. When performing more advanced adjustment, see “4-2. Color Adjustment” (p.23) and subsequent pages.

4-1. Screen Adjustment

Screen adjustments for the LCD monitor should be used in suppressing screen flickering and also for adjusting the screen to its proper position. There is only one correct position for each display mode. It is also recommended to use the ScreenManager function when first installing the display or whenever changing the system.

Adjustment Procedure

NOTE

- Allow the LCD monitor to stabilize for at least 20 minutes before making image adjustments.

1. Press the Auto Adjustment Button on the control panel.

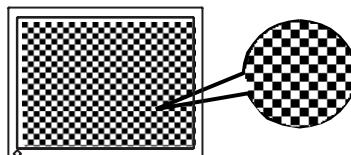

The message “Your setting will be lost, if you press again now.” appears and remains on the screen for 5 seconds. While the message is on the screen, press the Auto Adjustment Button again to automatically adjust the clock, phase, and screen position. If you do not wish to do adjust the screen, do not press the Auto Adjustment Button again.

NOTE

- The Auto Adjustment function is intended for use on AT-compatible PC running Windows. It may not work properly in either of the following cases.
When running an AT-compatible PC on MS-DOS (Not windows). The background color for the “wall paper” or “desktop” pattern is set to black.

If the appropriate screen can not be made by using the Auto Adjustment Button, adjust the screen through the following procedures. If the appropriate screen can be made, proceed to step 4.

- 2.** We recommend setting the desktop pattern to that as shown in the diagram below.

NOTE

- More precise adjustment is available for using the “Screen Adjustment program” utility software. It can be downloaded from the EIZO homepage (<http://www.eizo.com/>).

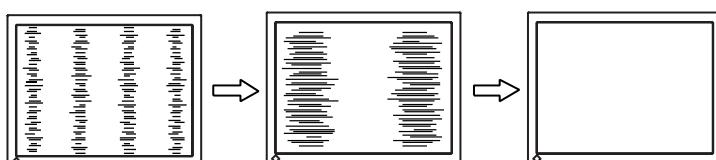

- 3.** Adjust by using <Screen> menu in the ScreenManager.

- (1) Vertical bars appear on the screen

→ Use the <Clock> (p.34) adjustment.

Select the <Clock> and eliminate the vertical bars by using the Right and Left of the Control Buttons.

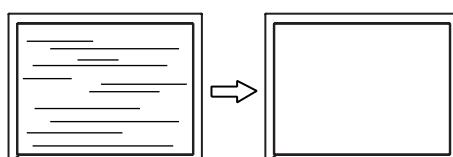

Do not continuously press the Control Buttons, as the adjustment value will change quickly and make it difficult to locate the most suitable adjustment point. If the horizontal flickering, blur or bars appear, proceed to <Phase> adjustment as follows.

- (2) Horizontal bars appear on the screen.

→ Use the <Phase> (p.34) adjustment.

Select the <Phase> and eliminate the horizontal flickering, blurring or bars by using the Right and Left Buttons.

NOTE

- Horizontal bars may not completely disappear from the screen depending on the PC.

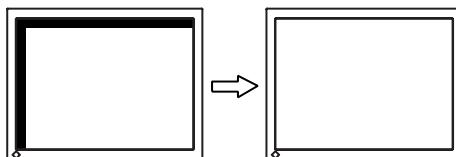

(3) The screen position is incorrect.

→  Use the <Position> adjustment.

The correct displayed position of the monitor is decided because the number and the position of the pixels are fixed. The “Position” adjustment moves the image to the correct position.

Select <Position> and adjust the position by using the Up, Down, Right and Left Buttons.

If vertical bars of distortion appear after finishing the <Position> adjustment, return to <Clock> adjustment and repeat the previously explained adjustment procedure. Clock→Phase→Position

4. To adjust the output signal range (Dynamic Range) of the signal.

→  Use the <Range Adjustment> (p.35).

This controls the level of output signal range to display the whole color gradation (256 colors).

[Procedure]

Press the Auto Adjustment Button on the control panel while displaying the <Range Adjustment> menu to automatically adjust the range. The screen blanks for a moment, and adjusts the color range to display the whole color gradation of the current output signal.

5. To smooth the blurred texts of the enlarged screen of the lower resolutions.

→  Switch the <Smoothing> setting.

<Smoothing> is clear-cut the letters or lines.

Select <Smoothing> in the screen menu and select the suitable level from 1 ~ 5.

NOTE

- The “Smoothing” is disabled in the resolution 1280 x 1024.
- Since the displayed image is enlarged, the blurred texts may not be necessarily lost completely.

4-2. Color Adjustment

In the analog input, perform the “Range Adjustment” (p.22) before making the color adjustments.

The <Color> menu in the ScreenManager enables to change the color of the screen. By using the <Color Mode>, the adjustment mode can be selected from <Custom mode> (to adjust the color settings according to your preference) and <sRGB> mode.

NOTE

- Allow the LCD monitor to stabilize for at least 20 minutes before making image adjustments. (Allow the monitor to warm up for at least 20 minutes before making adjustments.)
- Performing the <Reset> of the <Color> menu returns the color settings to the default settings.
- The values shown in percentages represent the current level within the specific adjustment. They are available only as a reference tool. (To create an uniform white or black screen, the percentages for each will probably not be the same.)
- Direct pressing the Mode Button on the control panel also can show or switch the Color Mode.

Adjustment Contents

Menu	Color Mode		Function Descriptions	Adjustable range
	Custom	sRGB		
 Brightness	√	√	To set the brightness of the screen	0 ~ 100%
			NOTE	<ul style="list-style-type: none"> Direct pressing the up and down control button also can adjust the brightness (When ScreenManager does not appear.). After the adjustment, press Enter button to save the data.
 Temperature (p.34)	√	-	To set the color temperature	4,000 ~ 10,000 K in 500 K increments (including 9,300 K). Default setting is off (normal white)
			NOTE	<ul style="list-style-type: none"> The values shown in the Kelvin are available only as a reference tool. Setting the temperature under 4,000 K or over 10,000 K invalidates the color temperature setting. (The color temperature's setting turns “OFF”.)

Menu	Color Mode		Function Descriptions	Adjustable range
	Custom	sRGB		
Gamma (p.34) 	✓	-	To set the gamma value	1.8 ~ 2.6
			NOTE	<ul style="list-style-type: none"> If setting the gamma value, the using the monitor in the digital signal input is recommended.
Saturation 	✓	-	To change the saturation	<p>-128 ~ 127 Setting the minimum level (-128) turns the image to the monochrome.</p>
			NOTE	<ul style="list-style-type: none"> The <Saturation> adjustment may cause undisplayable color tone.
Hue 	✓	-	To change the flesh color, etc.	-32 ~ 32
			NOTE	<ul style="list-style-type: none"> The <Hue> adjustment may cause undisplayable color tone.

Reset 	✓	-	To return the color settings to the default settings	Select the "Reset".

5. ATTACHING A STAND

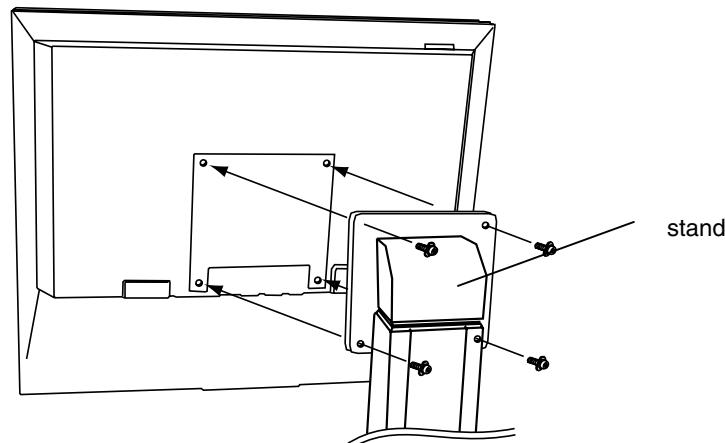

The LCD monitor can be used with other stand by removing the tilt stand and attaching the stand to the LCD monitor.

NOTE

- When attaching an arm or stand, follow the instructions of their user's manual.
- When using another manufacturer's arm or stand, confirm the following in advance and select one conforming to the VESA standard.
 - Clearance between the screw holes: 100 mm x 100 mm
 - Thickness of plate: 2.6 mm
 - Strong enough to support weight of the monitor unit (except the stand) and attachments such as cables.
- Attach an arm or stand to meet the following tilt angles of the monitor.
 - Up 45 degrees, down 0 degrees (Within operating range)
- Please connect cables after attaching a stand.

Setup Procedure

1. Lay the LCD monitor down. Do not scratch the panel.
2. Remove the tilt stand by loosening the 4 screws.
3. Attach a stand to the LCD monitor securely with the same screws.

4 Mounting Screws: M4 x 12 mm

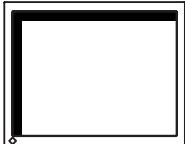

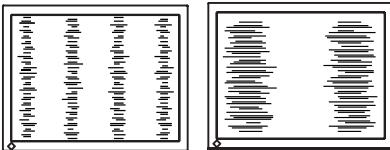

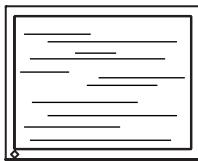

6. TROUBLESHOOTING

If a problem persists even after applying the suggested remedies, contact an EIZO dealer. The latest FAQ information is supplied on EIZO homepage (<http://www.eizo.com/>).

- No Picture Problems

Problems	Points to check with possible solutions
1. No picture <ul style="list-style-type: none"> Indicator status: Off 	<input type="checkbox"/> Check that the power cord is correctly connected. If the problem persists, turn off the monitor power for a few minutes, then turn it back on and try again.
<ul style="list-style-type: none"> Indicator status: Blue Indicator status: Yellow Flashing 	<input type="checkbox"/> Check the “Brightness” setting. <input type="checkbox"/> Switch the signal input by pressing the Input Signal Selection Button on the front control panel. <input type="checkbox"/> Try pressing the power switch.
2. Following messages appear. (Error messages shown below will remain on the screen for 40 seconds.) <div data-bbox="198 1006 542 1181" style="border: 1px solid black; padding: 10px; width: fit-content;"> <p style="text-align: center;">Signal Check</p> <p style="text-align: center;">Analog</p> <p style="text-align: center;">No Signal</p> </div>	<p>These message appear when the signal is not inputted correctly, even if the monitor functions properly.</p> <input type="checkbox"/> When the image is displayed correctly after a short time, there is no problem with the monitor. (Some PCs do not output the signal soon after powering on.) <input type="checkbox"/> Check that the PC is turned ON. <input type="checkbox"/> Check that the signal cable is properly connected to the PC or graphics board. <input type="checkbox"/> Switch the signal input by pressing the Input Signal Selection Button on the front control panel.
<ul style="list-style-type: none"> Whenever an error signal message appears, the signal frequency will be displayed in red. <div data-bbox="187 1407 551 1601" style="border: 1px solid black; padding: 10px; width: fit-content;"> <p style="text-align: center;">Signal Error</p> <p style="text-align: center;">Digital</p> <p style="text-align: center;">fD: 70.0MHz</p> <p style="text-align: center;">fH: 40.0kHz</p> <p style="text-align: center;">fV: 60.0Hz</p> </div>	<input type="checkbox"/> Use the graphics board's utility software to change the frequency setting. (Refer to the manual of the graphics board.)

- Imaging problems

Problems	Points to check with possible solutions
3. Display position is incorrect. 	<input type="checkbox"/> Adjust the image position using the <Position> (p.22) <input type="checkbox"/> The two display modes, VGA 720 x 400 (70 Hz) and 320 x 200 (70 Hz), have the same signal timings. Using this adjustment selects the appropriate display mode. (This function effects only when the resolution is VGA 720 x 400 (70 Hz) or 320 x 200 (70 Hz).) <input type="checkbox"/> If the problem persists, use the graphics board's utility software to change the display position if available.
4. Vertical bars of distortion appear. 	<input type="checkbox"/> Decrease the vertical bars using the <Clock> (p.21)
5. Horizontal bars of distortion appear. 	<input type="checkbox"/> Decrease the horizontal bars using the <Phase> (p.21)
6. Letters and lines appear blurred.	<input type="checkbox"/> Switch the <Smoothing> mode. (p.22)
7. The screen is too bright or too dark.	<input type="checkbox"/> Adjust the <Contrast and brightness> (The backlight of the LCD monitor has a fixed life span. When the screen becomes dark or begins to flicker, please consult your dealer.)
8. Afterimages appear.	<input type="checkbox"/> When the screen image is changed after displaying the same image for a long period, an afterimage may appear. The "Afterimage" can be removed gradually by changing the displayed image. Use the "Off Timer" function and avoid keeping the screen on all the time.(p.18)
9. The screen has defective pixels (e.g. slightly light or dark).	<input type="checkbox"/> This is due to the characteristics of the panel itself, and not the LCD product.

- Other problems

Problems	Points to check with possible solutions
10.The <Smoothing> cannot be selected.	<input type="checkbox"/> <Smoothing> is disabled when the screen is displayed in the 1280 x 1024.
11.The Enter Button does not operate.	<input type="checkbox"/> The adjustment lock is probably on. To unlock: switch the LCD monitor off. Then, while pressing the Auto Adjustment Button switch, the power on. (p.18)
12.The Auto Adjustment Button does not operate.	<input type="checkbox"/> The adjustment lock is probably on. To unlock: switch the LCD monitor off. Then, while pressing the Auto Adjustment Button switch, the power on. (p.18) <input type="checkbox"/> The Auto adjustment function is intended for use on the AT-compatible PC running Windows. It may not work properly in either of the following cases. <ul style="list-style-type: none"> • When running an AT-compatible PC on MS-DOS (Not windows). • The background color for the “wall paper” or “desktop” pattern is set to black. <input type="checkbox"/> Some signals from a graphics board may not function properly.

- Touch Panel Problems

Problems	Points to check with possible solutions
13.Cursor is jittery. / Drawing lines are not straight and smooth.	<input type="checkbox"/> The influence of metal may cause jittery cursor. <input type="checkbox"/> When multiple monitors are placed close to each other, leave space between monitors.

Problems	Points to check with possible solutions
14.Cursor position is not correct./ Cursor jumps.	<ul style="list-style-type: none"> <input type="checkbox"/> When cursor position is incorrect or cursor jumps, turn off and on the monitor. If the symptom is not improved, perform the calibration on the monitor. <ul style="list-style-type: none"> • Do not touch the screen while turning on the PC and the monitor. Touch the screen one second later after appearing the image. • Changing the position or angle of the monitor will cause cursor jump. <input type="checkbox"/> The drawing touch and dragging the finger on the touch panel to draw the picture may cause incorrect cursor position. <input type="checkbox"/> Keep metals away from the panel surface. <input type="checkbox"/> Touch with one finger only. Keep other fingers away from the touch screen. Do not rest the hand in the monitor or bezel while touching the screen. <input type="checkbox"/> The spray for preventing static electricity may influences the sensibility of the touch panel. Do not use it on cleaning.
15.No touch sound.	<ul style="list-style-type: none"> <input type="checkbox"/> Under Windows 7, touch sound is only output through the audio output terminal of the PC. To hear touch sound, connect speakers. <input type="checkbox"/> The touch sound may not be output from the external line out of the PC depending on the hardware configuration.

7. CLEANING

Periodic cleaning is recommended to keep the monitor looking new and to prolong its operation lifetime.

NOTE

- Chemicals such as alcohol and antiseptic solution may cause gloss variation, tarnishing, and fading of the cabinet or panel, and also quality deterioration of the image.
- Never use any thinner, benzene, wax, and abrasive cleaner, which may damage the cabinet or panel.
- Do not allow liquid to enter the clearance between the panel and the panel frame.
- The optional ScreenCleaner is recommended for cleaning the panel surface.

If necessary, the stains on the cabinet and panel surface can be removed by moistening part of a soft cloth with water.

9. GLOSSARY

Clock

With the analog input signal display, the analog signal is converted to a digital signal by the LCD circuitry. To convert the signal correctly, the LCD monitor needs to produce the same number clock pulse as the dot clock of the graphics system. When the clock pulse is not correctly set, some vertical bars of distortion are displayed on the screen.

Color Temperature (Temperature)

Color Temperature is a method to measure the white color tone, generally indicated in degrees Kelvin. At high temperatures the white tone appears somewhat blue, while at lower temperatures it appears somewhat red. Computer monitors generally give best performance at high temperature settings.

5,000 K: Slightly reddish white.

6,500 K: Warm-white tone, similar to white paper or daylight.

9,300 K: Slightly bluish white.

DVI

(Digital Visual Interface)

A digital flat panel interface. DVI can transmit digital data from the PC directly without loss with the signal transition method “TMDS”.

There are two kinds of DVI connectors. One is DVI-D connector for digital signal input only. The other is DVI-I connector for both digital and analog signal inputs.

Gain Adjustment

Adjusts each color parameter for red, green and blue. The color of the LCD monitor is displayed through the color filter of the LCD panel. Red, green and blue are the three primary colors. The colors on the monitor are displayed by combining these three colors. The color tone can change by adjusting the illumination amount passed through each color's filter.

Gamma

Generally, the relationship that the light intensity values of a monitor change nonlinearly to the input signal level is called “Gamma Characteristic”. On the monitor, low gamma values display the whitish images and high gamma values display the high contrast images.

Phase

The phase adjustment decides the sampling timing point for converting the analog input signal to a digital signal. Adjusting the phase after the clock adjustment will produce a clear screen.

Range Adjustment

The Range Adjustment controls the level of output signal range to display the whole color gradation.

Resolution

The LCD panel consists of a fixed number of pixel elements which are illuminated to form the screen image. The display panel of this monitor consists of 1280 horizontal pixels and 1024 vertical pixels. At a resolution of 1280 x 1024, images are displayed as a full screen (1:1).

sRGB (Standard RGB)

“International Standard for Red, Green, and Blue color space”

A color space was defined with the aim of the color matching between applications and hardware devices, such as monitors, scanners, printers and digital cameras. As a standard default space, sRGB allows Internet users to closely match colors.

TMDS

(Transition Minimized Differential Signaling)

A signal transition method for the digital interface.

APPENDIX/ANHANG/ANNEXE

Preset Timing Chart for Analog input

Timing-Übersichten für Analog Eingang

Synchronisation des Signaux pour Analog numérique

Based on the signal diagram shown below 16 factory presets have been registered in the monitor's microprocessor.

Der integrierte Mikroprozessor des Monitors unterstützt 16 werkseitige Standardeinstellungen (siehe hierzu die nachfolgenden Diagramme).

16 signaux ont été enregistrés en usine dans le microprocesseur du moniteur, conformément au diagramme de synchronisation ci-dessous.

Mode	Dot Clock MHz	Sync Polarity		Frequencies	
		H	V	H kHz	V Hz
VGA Mode13 320 × 200	25.2	Nega.	Nega.	31.47	59.94

EMC Information

Essential performance of FlexScan L760T-C is to display images and operate functions normally.

CAUTION

The FlexScan L760T-C requires special precautions regarding EMC and need to be installed, put into service and used according to the following information.

Do not use any cables other than the cables that provided or specified by us.

Using other cables may cause the increase of emission or decrease of immunity.

**Do not put any portable and mobile RF communications equipment close to the FlexScan L760T-C.
Doing so may affect the FlexScan L760T-C.**

The FlexScan L760T-C should not be used adjacent to or stacked with other equipment. If adjacent or stacked use is necessary, the equipment or system should be observed to verify normal operation in the configuration in which it will be used.

Guidance and manufacturer's declaration - electromagnetic emissions		
The FlexScan L760T-C is intended for use in the electromagnetic environment specified below. The customer or the user of the FlexScan L760T-C should assure that it is used in such an environment.		
Emission test	Compliance	Electromagnetic environment - guidance
RF emissions EN55011	Group 1	The FlexScan L760T-C uses RF energy only for its internal function. Therefore, its RF emission are very low and are not likely to cause any interference in nearby electronic equipment.
RF emissions EN55011	Class B	The FlexScan L760T-C is suitable for use in all establishments, including domestic establishments and those directly connected to the public low-voltage power supply network that supplies buildings used for domestic purposes.
Harmonic emissions EN61000-3-2	Not applicable	
Voltage fluctuations / flicker emissions EN61000-3-3	Complies	

Guidance and manufacturer's declaration - electromagnetic immunity			
The FlexScan L760T-C is intended for use in the electromagnetic environment specified below. The customer or the user of the FlexScan L760T-C should assure that it is used in such an environment.			
Immunity test	IEC60601 test level	Compliance level	Electromagnetic environment - guidance
Electrostatic discharge (ESD) EN61000-4-2	±6kV contact ±8kV air	±6kV contact ±8kV air	Floors should be wood, concrete or ceramic tile. If floors are covered with synthetic material, the relative humidity should be at least 30%.
Electrical fast transient / burst EN61000-4-4	±2kV for power supply lines ±1kV for input/output lines	±2kV for power supply lines ±1kV for input/output lines	Mains power quality should be that of a typical commercial or hospital environment.
Surge EN61000-4-5	±1kV line(s) to line(s) ±2kV line(s) to earth	±1kV line(s) to line(s) ±2kV line(s) to earth	Mains power quality should be that of a typical commercial or hospital environment.
Voltage dips, short interruptions and voltage variations on power supply input lines EN61000-4-11	<5% Ut (>95% dip in Ut) for 0.5 cycle 40% Ut (60% dip in Ut) for 5 cycles 70% Ut (30% dip in Ut) for 25 cycles <5% Ut (>95% dip in Ut) for 5sec	<5% Ut (>95% dip in Ut) for 0.5 cycle 40% Ut (60% dip in Ut) for 5 cycles 70% Ut (30% dip in Ut) for 25 cycles <5% Ut (>95% dip in Ut) for 5sec	Mains power quality should be that of a typical commercial or hospital environment. If the user of the FlexScan L760T-C requires continued operation during power mains interruptions, it is recommended that the FlexScan L760T-C be powered from an uninterruptible power supply or a battery.
Power frequency (50/60Hz) magnetic field EN61000-4-8	3A/m	3A/m	Power frequency magnetic fields should be at levels characteristic of a typical location in a typical commercial or hospital environment.

NOTE Ut is the a.c. mains voltage prior to application of the test level.

Guidance and manufacturer's declaration - electromagnetic immunity			
The FlexScan L760T-C is intended for use in the electromagnetic environment specified below. The customer or the user of the FlexScan L760T-C should assure that it is used in such an environment.			
Immunity test	IEC60601 test level	Compliance level	Electromagnetic environment - guidance
Conducted RF EN61000-4-6	3Vrms 150kHz to 80MHz	3V	Portable and mobile RF communications equipment should be used no closer to any part of the FlexScan L760T-C, including cables, than the recommended separation distance calculated from the equation applicable to the frequency of the transmitter.
Radiated RF EN61000-4-3	3V/m 80MHz to 2.5GHz	3V/m	<p>Recommended Separation distance</p> $d = 1.2 \sqrt{P}$ $d = 1.2 \sqrt{P}, 80\text{MHz} \text{ to } 800\text{MHz}$ $d = 2.3 \sqrt{P}, 800\text{MHz} \text{ to } 2.5\text{GHz}$ <p>Where "P" is the maximum output power rating of the transmitter in watts (W) according to the transmitter manufacturer and "d" is the recommended separation distance in meters (m).</p> <p>Field strengths from fixed RF transmitters, as determined by an electromagnetic site survey^a, should be less than the compliance level in each frequency range^b.</p> <p>Interference may occur in the vicinity of equipment marked with the following symbol.</p> 
NOTE 1 At 80 MHz and 800 MHz, the higher frequency range applies.			
NOTE 2 These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.			
^a Field strengths from fixed transmitters, such as base stations for radio (cellular/cordless) telephones and land mobile radios, amateur radio, AM and FM radio broadcast and TV broadcast cannot be predicted theoretically with accuracy. To assess the electromagnetic environment due to fixed RF transmitters, an electromagnetic site survey should be considered. If the measured field strength in the location in which the FlexScan L760T-C is used exceeds the applicable RF compliance level above, the FlexScan L760T-C should be observed to verify normal operation. If abnormal performance is observed, additional measures may be necessary, such as reorienting or relocating the FlexScan L760T-C.			
^b Over the frequency range 150 kHz to 80 MHz, field strengths should be less than 3 V/m.			

Recommended separation distances between portable and mobile RF communications equipment and the FlexScan L760T-C

The FlexScan L760T-C is intended for use in an electromagnetic environment in which radiated RF disturbances are controlled. The customer or the user of the FlexScan L760T-C can help prevent electromagnetic interference by maintaining a minimum distance between portable and mobile RF communications equipment (transmitters) and the FlexScan L760T-C as recommended below, according to the maximum output power of the communications equipment.

Rated maximum output power of transmitter W	Separation distance according to frequency of transmitter m		
	150kHz to 80MHz $d = 1.2 \sqrt{P}$	80MHz to 800MHz $d = 1.2 \sqrt{P}$	800MHz to 2.5GHz $d = 2.3 \sqrt{P}$
0.01	0.12	0.12	0.23
0.1	0.38	0.38	0.73
1	1.2	1.2	2.3
10	3.8	3.8	7.3
100	12	12	23

For transmitters rated at a maximum output power not listed above, the recommended separation distance "d" in meters (m) can be estimated using the equation applicable to the frequency of the transmitter, where "P" is the maximum output power rating of the transmitter in watts (W) according to the transmitter manufacturer.

NOTE 1 At 80 MHz and 800 MHz, the separation distance for the higher frequency range applies.

NOTE 2 These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.

Cable length		
Power Cord :	Accessory	2.0m
Signal Cable (MD-C87) :	Accessory	2.0m

Hinweise zur Auswahl des richtigen Schwenkarms für Ihren Monitor

Dieser Monitor ist für Bildschirmarbeitsplätze vorgesehen. Wenn nicht der zum Standardzubehör gehörige Schwenkarm verwendet wird, muss statt dessen ein geeigneter anderer Schwenkarm installiert werden. Bei der Auswahl des Schwenkarms sind die nachstehenden Hinweise zu berücksichtigen:

Der Standfuß muß den nachfolgenden Anforderungen entsprechen:

- a) Der Standfuß muß eine ausreichende mechanische Stabilität zur Aufnahme des Gewichtes vom Bildschirmgerät und des spezifizierten Zubehörs besitzen. Das Gewicht des Bildschirmgerätes und des Zubehörs sind in der zugehörigen Bedienungsanleitung angegeben.
- b) Die Befestigung des Standfusses muß derart erfolgen, daß die oberste Zeile der Bildschirmanzeige nicht höher als die Augenhöhe eines Benutzers in sitzender Position ist.
- c) Im Fall eines stehenden Benutzers muß die Befestigung des Bildschirmgerätes derart erfolgen, daß die Höhe der Bildschirmmitte über dem Boden zwischen 135 – 150 cm beträgt.
- d) Der Standfuß muß die Möglichkeit zur Neigung des Bildschirmgerätes besitzen (max. vorwärts: 5°, min. nach hinten $\geq 5^\circ$).
- e) Der Standfuß muß die Möglichkeit zur Drehung des Bildschirmgerätes besitzen (max. $\pm 180^\circ$). Der maximale Kraftaufwand dafür muß weniger als 100 N betragen.
- f) Der Standfuß muß in der Stellung verharren, in die er manuell bewegt wurde.
- g) Der Glanzgrad des Standfusses muß weniger als 20 Glanzeinheiten betragen (seidenmatt).
- h) Der Standfuß mit Bildschirmgerät muß bei einer Neigung von bis zu 10° aus der normalen aufrechten Position kippsicher sein.

Recycling Information

This product, when disposed of, is supposed to be collected and recycled according to your country's legislation to reduce environmental burden. When you dispose of this product, please contact a distributor or an affiliate in your country.

The contact addressees are listed on the EIZO website below.

<http://www.eizo.com>

For recycling information for customers in Switzerland, please refer to the following website.
